

deCODEme Health Watch test (50 items)

1)	ABO blood type	26)	Hemochromatosis
2)	Abdominal aortic aneurysm	27)	hypertension
3)	Age related macular degeneration	28)	Kidney stones
4)	Alcohol flush reaction	29)	Lactose intolerance
5)	Alzheimer's disease	30)	Lung cancer
6)	Asthma	31)	Male pattern baldness
7)	Atrial fibrillation	32)	Multiple sclerosis
8)	Basal cell carcinoma	33)	Nicotine dependence
9)	Bitter taste preception	34)	Obesity
10)	Bladder cancer	35)	Ovarian cancer
11)	Brain aneurysm	36)	Pancreatic cancer
12)	Brain cancer-glioma	37)	Peripheral arterial disease
13)	Breast cancer	38)	Prostate cancer
14)	Celiac disease	39)	Psoriasis
15)	Chronic kidney disease	40)	Restless legs syndrome
16)	Chronic lymphocytic leukemia	41)	Rheumatoid arthritis
17)	Chronic obstructive pulmonary disease	42)	Statin induced myopathy
18)	Colorectal cancer	43)	Systemic lupus erythematosus
19)	Crohn's disease	44)	Testicular cancer
20)	Essential tremor	45)	Thyroid cancer
21)	Exfoliation glaucoma	46)	Type 1 diabetes
22)	Eye color	47)	Type 2 diabetes
23)	Gallstones	48)	Ulcerative colitis
24)	Gout	49)	Venous thromboembolism
25)	Heart attack	50)	Warfarin metabolism

あなたのルーツは？ (Genetic Atlas)

In the genetic atlas your genetic code is compared to 50 different populations from all over the world. We use a powerful statistical method to analyze your genome along with those of over 1,000 individuals from all over the world.

The right figure represents the similarity rank one group with your closest genetic similarity. This is a comparative genetic map shows human beings divided into six regions of the world population 50.
